Skills

- JavaScript (ES6+)
- TypeScript
- Angular
- RxJs / NgRx
- Angular Material
- Redux
- React.js
- HTML & CSS/SCSS (Bootstrap)
- Node.js (Express)
- Python
- MongoDB & Mongoose
- SQl
- Appsmith
- Bonita Soft
- RESTful API
- Git
- Jira
- DevOps
- AWS
- Docker

Summary

With 5 years of extensive experience in web development, I have successfully contributed to diverse projects across various industries. As a Full-Stack Developer, I specialize in JavaScript, delivering seamless front-end and back-end solutions. My expertise includes crafting dynamic user interfaces with Angular and React, building scalable, robust back-end systems using Node.js and MongoDB, and developing efficient server-side applications with Python.

Additionally, I bring advanced proficiency in WordPress, delivering custom themes, plugins, and optimized websites tailored to clients' needs. I have experience working with BonitaSoft to design and automate workflows and with Appsmith to build custom internal tools, ensuring efficient and user-friendly solutions.

Throughout my career, I have consistently demonstrated the ability to design responsive applications, optimize performance, and implement innovative features tailored to business and user needs. Driven by a passion for problem-solving and continuous learning, I am committed to delivering impactful results in the ever-evolving world of web development.

Experience

Full Stack Software Developer

Algo3 | Jan 2023 - Current

Experienced developer with a proven track record of designing and implementing dynamic, user-focused solutions. Skilled in creating responsive interfaces, managing complex data flows, and enhancing application performance to ensure seamless user experiences. Strong ability to analyze and solve challenging problems, collaborate effectively within cross-functional teams, and deliver high-quality, maintainable code on time.

Demonstrated expertise in:

- Developing and maintaining scalable web applications.
- Designing intuitive and user-friendly interfaces.
- Debugging, troubleshooting, and optimizing applications for performance and scalability.
- Collaborating with teams to meet project goals and implement innovative solutions.

Full-Stack Developer

Tecklogics(USA client-based) | Islamabad, Pakistan | Jan 2020 - Dec 2022

- Passionate about building robust and scalable web applications, I am a Full-Stack JavaScript Developer at Tecklogics, specializing in Angular and React
- With a strong focus on creating responsive and user-friendly interfaces, I work within an agile environment and collaborate with cross-functional teams to deliver high-quality solutions that meet client requirements
- My experience also includes working with Node.js for backend development and a solid understanding of React.js principles
- 2+ years of experience in web development with a focus on building dynamic, responsive applications
- Extensive experience with Angular, including expertise in RxJS/NgRx for state management and Angular Material for UI components
- Proficient in JavaScript (ES6+) and TypeScript, ensuring code reliability and scalability
- Strong understanding of HTML & CSS/SCSS, with experience using frameworks like Bootstrap for responsive design
- Hands-on experience in React.js, with a solid understanding of component-based architecture and state management using Redux.
- Experience working with Node.js (Express) for server-side development, including creating and managing RESTful APIs
- Familiar with MongoDB & Mongoose for building and maintaining NoSQL databases
- Competent in using version control systems like Git for collaborative development and project tracking
- Experience in managing tasks and workflows using Jira, contributing to efficient project management and delivery
- Basic experience with DevOps practices and AWS, enabling support in cloud deployment processes
